# Lineage

## Lineage 1000

Embraer calls the Lineage 1000 a 'flying apartment,' and with a cabin of about 70 square meters, it is easy to see why. The cabin is longer and narrower than the Airbus and features five separate areas designed for work, dining, entertainment and sleeping, easily accommodating up to 19 passengers. Luggage is not a problem as the main cabin offers over nine cubic meters of space and an additional external-access luggage compartment offers over three cubic meters of extra volume. The Lineage 1000 is incredibly spacious and very comfortable since it is equipped with state-of-the-art turbulence detection and mitigation technology to ensure a smooth flight.
