Challenger

Bombardier Challenger 650

The Bombardier Challenger 650, introduced in 2015, is Bombardier's best-selling Large Jet. Its sleek, modern cabin is the largest in its class and can accommodate up to 12 passengers in large, comfortable seats. Each passenger has access to the private jet cabin configuration, entertainment system and flight information at all times, with integrated touchscreens. The Challenger 650 covers an impressive flight range. It can connect most of the world's capitals, performing very well on short routes, flying safely to airports such as London City, Lugano or any remote destination.
