AW109

AW109 Power Private Jet Charter

The AW109SP GrandNew is the latest derivative of the time-tested A109 series of helicopters, initially designed as rescue mission aircraft in the 1970s.

The GrandNew features pivotal technological advances while staying true to the efficient design and performance of the Grand. As a result, GrandNew successfully integrates modern innovation with its predecessor's time-tested strengths without losing sight of what made it great in the first place.
