Legacy

Embraer Legacy 450

This business jet ranks as one of the most versatile aircraft in its class, designed to fill the gap between the Phenom 300 and the popular Legacy 600 and 650 models. In addition to its excellent range and modern design, it features a quiet and bright cabin with fully reclining seats and a galley area, comfortably accommodating up to eight passengers. It is particularly suitable for groups traveling with a lot of luggage as it has considerable hold capacity.
